

Placementt

Enriching student opportunities by creating an interconnected network of students, businesses and educators across the UK

What is Placementt?

Placementt is an ecosystem for **students**, **institutes** and **businesses** to find, organise and manage work placements. It is comprised of three products centered around a UK-wide database of opportunities.

Placementt - Institute: Supports educational institutes in coordinating work experience, with a **customisable workflow** to process placements, tools to **track student progress**, and **robust communication channels**.

Placementt - Student: Allows students to find the ideal work experience in our **comprehensive database**, and to **track their progress** and **develop their skills**.

Placementt - Business: Provides businesses a platform to **manage their placements**, **headhunt students** and **advertise opportunities**.

Our mission

Work placements form the foundation of up to 25% of careers, 60% in specialised fields.

Your future career should not be influenced by who you know, but how you make use of the opportunities you are given. This is why our primary focus is on levelling the playing field between students and providing a free and open database of opportunities.

Work placements provide a wealth of experiences

Working world

Independence

Career options

Transferable
skills

Networking

Our mission

Support students, teachers and businesses in their work experience, and provide high quality, enriching placements to all students.

What we do

Placementt supports schools, colleges and universities in finding, organising and managing work placements.

Students

Level the playing field

- Free, accessible UK-wide database of work experience placements.
- Make informed choices based on in-depth placement details, and find placements that will be relevant and useful.

Staff

Reduce the administrative burden and prioritise student support

- Customisable placement management pathway.
- Built-in personalised analytics.
- Robust communication tools.
- An entirely paperless process.

Students

Encourage individual development and strengthening of future career paths

- Tools allowing progress tracking.
- Skill development analytics.
- Guides and tips.
- Feedback from employers and businesses.

Who we are

Placementt was founded by Tom and Daisy, two students at the University of Liverpool. The idea stemmed from creating a platform to aid in tracking the work experience required throughout the veterinary science degree.

Since its inception, our idea has expanded to supporting all students, whether in secondary school, on an apprenticeship or at university.

We also pride ourselves in not only supporting students, but the educators and businesses that make placements possible.

Placementt will drastically improve work experience for students, educators, and businesses, **strengthening future career options** and giving rise to the next generation of **motivated** and **inspired** individuals.
