

CareerThread Parent Guidance

Your child's school is using CareerThread to manage their work experience. CareerThread helps secondary schools to coordinate work experience placements while supporting students with daily reflections and post-placement feedback, ensuring a meaningful and structured experience.

While CareerThread supports secondary schools in managing work experience, **we do not currently find placements for your child**. The students remain responsible for organising placements directly with an employer.

Your school will securely upload your email address to our platform so we can keep you informed about your child's placement and any potential issues. If you have any concerns or would prefer not to share your email, please contact the school.

Once your child has uploaded details of their work experience, we will retrieve necessary documentation from the employer. We may also email you requesting sign-off on the placement. This is necessary for us to go ahead with the placement.

During your child's work experience, you can view placement details and feedback through the email links we send you, so you can monitor your child's progress.

If you have any questions on how CareerThread works, please get in touch by emailing Tom at tom@careerthread.co.uk.

Kind regards,

Thomas Barton
